

ITALO DISCO VSTi

Thank you for purchasing the Italo Disco VSTi and supporting ongoing productions.

The VST instrument was created as there were many music makers out there who wanted the Italo Disco Sample Packs, but had no sampler or program to use them. Now you can simply add this VSTi to your collection and select the sounds or drums as and when you need them by clicking on the simple GUI interface and selecting from the list.

Every sound has been mapped across the keyboard. You can manipulate the sound envelope, pan and control gain. If you want to adjust the cut-off and resonance of a sound, you can do this within your DAW using envelopes. The current software limitations prevents me from adding cut-off & resonance controls.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

Finally, may we ask you to please not illegally share, duplicate or modify this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.
