

R70 MODULE

Thank you for purchasing this 'Ronald' R70 VST instrument.

The R70 Drum Module is a superb drum machine using sample based sounds with samples taken direct from their classic drum machine range such as the TR808, 909, CR78 etc. All of the drum samples have been sampled from the R70 at the usual highest quality and mapped across the keyboard.

A Low Pass Filter is now included along with Reverb.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.
