

# R8M MODULE

Thank you for purchasing this 'Ronald' R8M VST instrument.

The R8M Drum Module is a full length 1U rack and is a rack mounted version of the classic R8. All of the drum kits and sounds have been sampled from this beast at the usual highest quality and mapped across the keyboard. You also have the bonus of 4 additional PCM ROM sample cards that have been also sampled and added.

'Contemporary Percussion', 'Jazz Brush', 'Sound Effects' and 'Power Drums USA'.

A Low Pass Filter is now included along with Reverb.

Many thanks to Audun Rødsten for sending the R8M and soundcards all the way from Norway for me to convert!:-)

**NOTE: Please place the included fonts into your 'FONTS' folder on your computer. This will show the correct display like what is shown above.**

**To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.**

**For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.**

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to [info@beatmachine.co.uk](mailto:info@beatmachine.co.uk) or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

## **PATCH LIST:**

### **Group List**
