

Thank you for purchasing the U20 VST instrument.

The VST instrument contains all of the 64 factory presets of the original synthesizer and also the four complete drum kits.

Every included sound has been meticulously sampled and mapped across the keyboard. You can manipulate the sound envelope, pan and control gain like on the actual synth. Reverb is also included.

Some of the patches are velocity layered like on the original instrument to mimic the synth exactly.

**NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.**

**To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will prompt you for your serial number located in the VST folder. It will then automatically be integrated within your setup.**

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to [info@beatmachine.co.uk](mailto:info@beatmachine.co.uk) or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

# PATCH LIST

## Group List

- ✓ Drum Kit - Dry Set
- Drum Kit - Electric Set
