

# # E P E C H E ||| O D E

Thank you for purchasing the Depeche Mode VST instrument. It has been created from the popular Depeche Mode Sample Pack and makes it much easier for those who have the ability to use VST instruments, but struggle with single sound samples.

The VST instrument uses quality samples from the band and also contains powerful sound samples from other synths and equipment that was extensively used by Depeche Mode. This is the new remodelled version with a much better GUI and many extra sounds added. Many of the original patches have also been updated and enhanced.

Every sound has been meticulously mapped across the keyboard. You can also manipulate the sound envelope, and control gain. The new GUI has LFO, Filter, Pitch and patch select buttons either side of the screen for easy scrolling through the patches.

**\*Please also copy the True Type Fonts from the 'Fonts' folder across to the Fonts folder on your computer so that the text in the interface will display correctly.**

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to [info@beatmachine.co.uk](mailto:info@beatmachine.co.uk) or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to please not illegally share, duplicate or modify this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

# PATCH LIST

## Group List
