

Thank you for purchasing this Korg Prophecy Guitar & FX VST instrument.

This VST covers all of the Guitar & FX sounds from this mighty little beast. There are 7 more VST instruments covering the rest of the Prophecy.

The Prophecy is a monophonic solo synthesizer, but in this VST you can change from Monophonic to Polyphonic to make the most of the incredible synths and pads, and even Legato mode for authenticity. In Mono mode, you will be able to use the Glide function.

Every included sound has been meticulously sampled from the Prophecy and is mapped & layered across the keyboard. You can manipulate the sound envelope and control gain like on the actual synth.

A Low/High Pass Filter is now included along with Reverb and LFO controls.

NOTE: Please place the included fonts into your 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

For Logic and Sierra users, please download the installation guide which includes the OSX Validation Tool. It can be found on the VST instruments page of the Beat Machine website.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

PATCH LIST

- ✓ Accoustic Guitar
